

IN THE CLAIMS

1 (Original). A portable processor-based system comprising:

a housing having top and bottom sides;
a display formed in said housing; and
a scroll wheel to control said display, said wheel extending through the top and
bottom sides of said housing.

2 (Original). The system of claim 1 wherein said system is a web tablet.

3 (Original). The system of claim 2 wherein said web tablet is a wireless web tablet.

4 (Original). The system of claim 1 wherein said control wheel scrolls said display up
and down.

5 (Original). The system of claim 1 wherein said wheel is positioned near the edge of
said housing such that said scroll wheel may be manipulated between the user's thumb and
forefinger.

6 (Original). The system of claim 5 wherein said scroll wheel is positioned so that the
scroll wheel may be manipulated by the user's thumb and forefinger at the same time that the
user's hand holds the system.

7 (Currently Amended). A method comprising:

providing a housing having top and bottom sides;
providing a display in said housing; and
providing enabling a scroll wheel that extends completely through the top and
bottom sides to be manipulated between the user's thumb and forefinger at the same time the
housing is held in the user's hand

8 (Original). The method of claim 7 including providing an Internet connection.

✓ Claim 9 (Canceled).

A1 10 (Original). The method of claim 7 including scrolling said scroll wheel between the user's thumb and forefinger to adjust the vertical display.

✓ Claims 11-15 (Canceled).
